

NX-A01

One-Box Cubic Stereo Speaker

Want a really handy speaker
for your MP3 music library
in your room?

Here it is!

Tiny speaker fills your room with music.

ENJOY ALL YOUR MUSIC

The NX-A01 works with anything that connects to a stereo mini jack: iPods, other MP3 players, laptops, even mobile phones that play music. Put away the headphones and enjoy your music library as you work or relax at home.

JUST TOUCH

The round control panel on the top to switch the speaker on and off, adjust the volume or mute the sound. You'll like the design, too — the futuristic cube shape with illumination on top looks cool in any room.

■ PUT IT ANYWHERE

This tiny speaker — you can hold it on your palm — goes anywhere you want. Put it on your desk, bedside table, bookshelf or kitchen counter. It's the easy way to fill any room with music.

■ BASS THAT ROCKS!

It may be small, but it punches out some great bass. Yamaha SR-Bass™ technology boosts the energy level inside the speaker to put the bass back in your MP3 sound.

Weight	0.31 kg; 7 lbs.
Included Accessories	AC Adaptor (DC12V) and audio cable for stereo mini jack

SR-Bass™ (Swing Radiator Bass™) Technology

Ordinary Bass Reflex Speakers

Many small speakers use a bass reflex design with a port (opening) on the front. However, the port is small, limiting the bass. Lengthening the port increases the bass, but also causes problems such as bass lag and wind sound.

Bass reflex speaker

SR-Bass increases the bass with no ill effects.

SR-Bass speaker

SR-Bass™

SR-Bass (Swing Radiator) Speaker

Yamaha's SR-Bass (Swing Radiator Bass™) speaker uses a Swing Radiator speaker diaphragm for the port. It moves by the vibration of the main diaphragm and efficiently increases bass energy. This produces larger sound pressure levels without the problems of bass reflex designs.

- iPod is a trademark of Apple Computer, Inc., registered in the U.S. and other countries.
